Pizza Dough

Reagan's homemade dough for personal pizzas

Illustration

Makes 6 personal pizzas
Oven 500°
Rise about 1 hour
Bake 9 min on a stone

INGREDIENTS

- 2 1/2 cups warm water
- 1/4 cup sugar
- 3 teaspoons instant yeast
- 1/4 cup vegetable oil
- 6 cups all-purpose flour
- 2 teaspoons salt

DIRECTIONS

1. Preheat the oven to 500°.
2. In the bowl of a stand mixer, combine the water, sugar and yeast. Allow the mixture to sit for a few minutes until frothy. Add in the vegetable oil.
3. In a bowl, combine the flour and the salt. Add the flour to the yeast mixture, 1/2 cup at a time, mixing well between additions. Continue adding the flour until the dough can be pulled away from the sides of the bowl with a spatula, but the dough will still be quite sticky. You may need to add in a little bit more or less flour, but the key is to remember that the dough will still be sticky and will stick to your fingers when you try to pull it apart.
4. Grease a large bowl, then scrape the dough into the bowl. Turn the dough to coat it in oil. Cover the bowl with plastic wrap or a towel and let the dough rise at room temperature until doubled, about 1 hour.
5. Roll out, prepare with toppings, bake on a stone for 9 minutes.

Notes: Add several tablespoons of Italian seasoning to the dough at the same time as adding the flour for a fun twist.

> **Heart-healthy tip:** Swap half the flour for whole wheat for extra fiber, use olive oil instead of vegetable oil, and go easy on cheese and processed meats. Pile on veggie toppings instead.
